## Network Topology

**Terminals / KVDs / Handhelds will need to be connected on the POS network to communicate**

**All networking printers need to have STATIC IP addresses.

Terminal
(Android, Windows or IOS)

**If you are using handhelds (Phone, iPad, or iPod), Andriod and Windows it needs to be connected to the POS wifi network name.

Ex;) SSID: ABC Restaurant - Tonic

Handhelds need to be connected to correct wifi, otherwise it will not work.

Kiosk
(Android, Windows or IOS)

Handheld
(Android, Windows or IOS)

***POS NETWORK OVERVIEW***
The restaurant needs to follow this diagram in order to have a well maintained POS network. Cabling needs to completed in order to connect all networking devices to the switch/internet. The following diagram gives an idea of what is recommended to complete the installation of your terminals. printers and networking

Switch

Router

Modem

**A switch is required ONLY if you need to connect more than 1 device, depending on the ports available from the router.

Router/Wireless Router

Make sure hat LAN IP address on the router does not conflict with modem.**

**This device could also be a DSL modem depending on your Internet Service Provider. Make sure hat LAN IP address on the modem does not conflict with internal router.**

tonic.
